ABOUT ME

Developer since 2016, I started with an initial focus on C#. But in 2020 I transitioned to Front-End. Along the way, I've helped companies and startups realize their visions into projects.

Additionally, my soft skills, including effective communication, creativity, empathy and teamwork, strengthen my ability to collaborate productively, solve problems innovatively and create a positive and efficient work environment.

EXPERIENCE

ScrumLaunch — *Front-end developer*

Aug 2021 - now

I worked with people from all over the world and developed a few projects using web stacks (specially ReactJS, NextJS, RestAPI and GraphQL). I was a contractor on a few companies and projects, I created Adminpanels, landing pages, social-medias and more.

Most important projects:

1. I spent all 2023 working as a contractor on this fintech with 8M+ clients, the team which I worked with was responsible for maintaining the support page and creating projects for internal use, to manage accounts, etc. I used GraphQL and ReactJS on frontend and I also developed a few backend features using NodeJS (express);
2. It was a social media to see short videos, it has a few features like a feed, trending videos and recommendations. I used ReactJS.

ClickCard — *Front-end and Mobile developer*

Oct 2020 - Aug 2021

I worked at the company's website and blog, using ReactJS and NextJS, sometimes I worked at the App using React Native. This startup objective is to create Digital Business Cards and improve the Network.

PERSONAL PROJECTS

Heelpy

I created all the App using Expo EAS and React Native, I builded and deployed to stores. It is a personal security application that records, maps and monitors users' routes, intervening by sending an Alert to the user's contacts if they leave the route or disappear unexpectedly.

HARD SKILLS

React.js

Next.js

Javascript

Typescript

HTML

CSS

SEO

GraphQL

ChakraUI

Tailwind

Styled-components

Firebase

React Native

Expo EAS

Node.js

Express

Prisma

Main Education [courses]

GoStack - Rocketseat

Javascript - IFSUL

Programming Logic - Flexxo

LANGUAGES

English and Portuguese
